Stolen Automobiles Kill Sales of Cars in Mexico

WASHINGTON, Feb. 4. Stolen American automo-biles are overrunning the Mexican market, according to a re-port to the Commerce Department to-day from John W. Dye, Consul

The report said so many automobiles stolen in the United States were being sold in northern Mexico for about half their market value that the legitimate automobile

sales business was seriously af-fected.

The cars, the report added, come principally from California and points near the Mexican border, although some have come from as far as Chicago.

The completeness of the results obtained by the Conference for the Limitation of Armament and Consideration of Pacific and Far Eastern Governor Startles Realty Men Hopes for Treaty to Abolish Problems can be visualized best by comparing its accomplishments with the agenda which was prepared in advance as a chart for its course.

A comparison of the program with what has been achieved shows that nearly everything that was undertaken has been done. In some cases the results were not so complete as expected, and in the case of land armaments the conference was compelled to acknowledge its inability to do anything.

The promises contained in the agenda, compared with the conference achievements, are as follows:

LIMITATION OF NAVAL ARMAMENT. Under which shall be discussed (A) Basis of limitation, (B) Extent, (C)

ACCOMPLISHMENTS.

Capital ships limited in accordance with the 5-5-3 ratio and a ten year naval holiday declared; limitations made as to aircraft carriers; plans for naval holiday dectared; limitations hade as to airctait carriers, plans scrapping prepared; provisions made for replacement and a new conference arranged for in the event of changed conditions; all contained in the five Power naval treaty.* The conference, under this heading, failed to secure limitation of the number of submarines and auxiliary craft.

RULES FOR CONTROL OF NEW AGENCIES OF WARFARE.

Rules made outlawing the submarine as an agency of attack against erchant ships. The Powers at the conference pledge themselves to observe at once this new rule of submarine warfare as among themselves and will indicated by its merely material results. It has changed the attitude of mind of the Powers taking part in it, and made them think in terms of merely made against use of poison gas. New York Herald Bureau. Washington, D. C., Feb. 4. Solemn pledges were made to-day by the nine most important Powers to cooperate for the maintenance of peace on land and on sea.

These pledges have been reducto treaties clearly setting forth the obligations of the nations participating in the most momentous international conference ever held.

The instruments will be signed under impressive circumstances on Monday in the presence of the President of the United States, who will pass judgment on the great undertakings accomplished and express the gratitude of the American people for the services rendered by the Governments of Great Britain, France Italy, Portugal, Belgium, Holland

Japan and China. Session Lasts Three Hours.

The speed with which the actual work of the conference was accomplished in a good natured and businesslike three hour session of the conference to-day leaves little to be done beyond the signing of the

treaties. Almost the entire session of the conference was devoted to providing helpless China. The sole reference made to agreements already consummated was in the nature of a treaty supplementing the four Power agreement on the part of the United States, Great Britain, France and

Japan The effect of this interpretative in strument was to dispose of the objections raised by critics of the four the fact that the Japanese homeland is not included within the terms of

the original instrument. Shackles Taken Off China.

Aside from this the conference provided the majority of the delegates for the aspirations of the Chinese people toward capable and modern government. Before the session was concluded protection was guaranteed to China against the aggressions of more powerful neighbors and the shackles of subjugation struck from her hitherto helpless limbs.
